Paramedic

Standing Order Medications

- Adenosine
- Albuterol (all indications, routes)
- Amiodarone – bolus infusion
- Anesthetic lidocaine for IO infusion
- Antiemetics (metaclopramide, ondansetron, promethazine)
- Aspirin
- Atropine
- Benzodiazepines (lorazepam, diazepam, midazolam) – all dosing/indications/routes (except sedation for pacing which requires call in)
- Calcium gluconate all indications
- Cyanide antidote kits
- Diphenhydramine
- Epinephrine (all dosing/indications/routes except continuous infusion)
- Furosemide
- Glucagon
- Haloperidol
- Ipratropium (all indications, routes)
- IV dextrose
- Magnesium sulfate bolus for torsades de pointes or eclampsia
- Methylprednisolone all indications
- Naloxone
- Nerve agent antidote
- Nitroglycerin (all routes, indications)
- Ophthalmic topical anesthetics
- Opioids (morphine, fentanyl, hydromorphone)
- Oral glucose
- Over-the-counter medications (acetaminophen, ibuprofen, etc)
- Pralidoxime
- Racemic epinephrine
- Sodium bicarbonate

Paramedic

Base Contact Required

- Amiodarone drip for stable wide complex tachycardia
- Benzodiazepines for sedation for transcutaneous cardiac pacing
- Calcium gluconate for calcium channel blocker OD
- Dopamine
- Epinephrine continuous infusion for shock states
